

# TPMS Pro

Enhanced TPMS service, TPMS diagnostics and tyre management

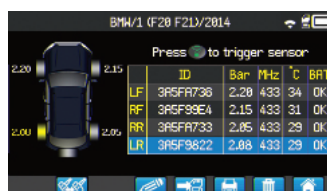

## Easy Navigation

The icons visually guide you through all features of the powerful TPMS Pro. Thanks to the icons, the tool is user-friendly and makes it easy to carry out necessary procedures.

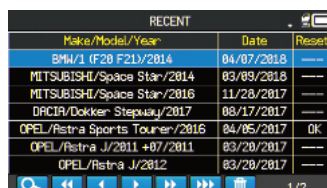

## Programming of Aftermarket Sensors

Programming aftermarket sensors, a set of five wheels at a time. Selection by sensor manufacturer or by car model and year.

## TPMS Sensor Intelligence

Activate and display sensor information for all OE TPMS sensors as well as most aftermarket TPMS sensors, including sensor ID, pressure, frequency, temperature, and battery status.

## TPMS Service History

Save, download and print vehicle audit reports. Filter information by car model, date and reset information.

## Features & Benefits

- > Triggers all OE and leading aftermarket TPMS sensors, including Schrader EZ-sensor, Alcar by Schrader, Alligator Sens-it, Huf Intellisens, REDI Sensor, Hamaton T-Pro/EU-Pro, Orange DirectFit/Universal EU and Mobiletron
- > Displays all TPMS sensor data, including tyre pressure, tyre temperature, sensor ID and the sensor battery status
- > Reads and clears TPMS DTC codes
- > Sensor selection by make, model and year
- > Worldwide vehicle coverage
- > Fast make-model-year lookup
- > Programs (copy/clone) all leading aftermarket sensors
- > Displays OBDII location on tool screen
- > Relearns to the vehicle's ECU via OBDII
- > ECU unlocking for Toyota family of vehicles
- > TPMS sensor part number look-up (OE and aftermarket)
- > Stores up to 65K TPMS service jobs
- > Built-in TPMS service help and training
- > Wi-Fi capable to synchronise jobs to PC and update software
- > Keep fully charged & print report onsite (TPMS Pro Print)
- > Tyre tread depth gauge (optional)
- > 3 year Update Plus inclusive (free software and database updates)

## Tyre Tread Depth Gauge

### Fast, Accurate, Reliable

The Tyre Tread Depth Gauge is an add-on accessory for the TPMS Pro tool. The accessory allows a user to quickly and accurately measure tyre tread depth. In one simple gesture, it can detect worn tyres, tyre damage and indicate poor alignment and possible worn front-end components.

- › Accessory to the TPMS Pro tool.
- › Quickly measure tread depth across a tyre
- › Measurements are displayed on the TPMS Pro tool
- › Configurable to four, five, six or seven tyres
- › Helps sell customers on needed tyre replacements, alignments and/or worn front-end, suspension component
- › Rugged rubberized grip handle
- › Two buttons for measurement and pin release
- › Gauge pin stores in tools when not in use
- › Powered directly from the TPMS Pro tool
- › Easily access tyre tread from inside the wheel well - right angle design.

# TPMS Pro: Convenient and efficient – everything under control

Read, diagnose and configure 100% of OE and leading aftermarket TPMS sensors
