

ProViu®360

Digital generation of the ProViu®360 camera system increases driver comfort and safety in Commercial and Off Highway vehicles

ProViu®360 is full digital surround view system using megapixel cameras and providing HD image on monitor. The Surround View System provides a complete 360° view around the entire vehicle. Allowing for simple blind spot mitigation, this intelligent camera system delivers a wide range of benefits in multiple everyday scenarios. Surround View was originally designed to give the driver new and previously unobtainable viewpoints of their vehicle, using typically 4 cameras and an ECU. The ProViu®360 System gives the driver a real-time surrounding view of the vehicle and reduces the risk of damage to persons or property thanks to this comprehensive view of the vehicle's surroundings.

- › High definition automotive cameras with outstanding performance
- › Enhanced image quality in HD resolution
- › Full digital surround view system
- › Dynamic 3D views & overlays
- › Genuine real time delivery at 30fps
- › 2nd generation based on years of experience
- › CAN-Bus and other GPIOs
- › Simplified calibration process
- › Flexible software tool chain for customization
