SINDRI online

SINDRI

The 5-minute digital vehicle check*.

SINDRI gives you simple, highly efficient access to vehicle information like error logs and selected live data that reflect the vehicle's health status. The application automatically performs a complete vehicle scan in no more than 5 minutes.

*The SINDRI vehicle check may take longer with some vehicle makes or models.

SINDRI

Digital, fast and profitable.

SINDRI provides instant access to on-board diagnostic data from vehicles. This completely new software can be installed on tablet devices, enabling workshops to work faster and offer more services.

Job reports are created quickly and efficiently, allowing you to read out vehicle data automatically across all vehicle systems. This saves you time by up to 30% compared to conventional procedures.

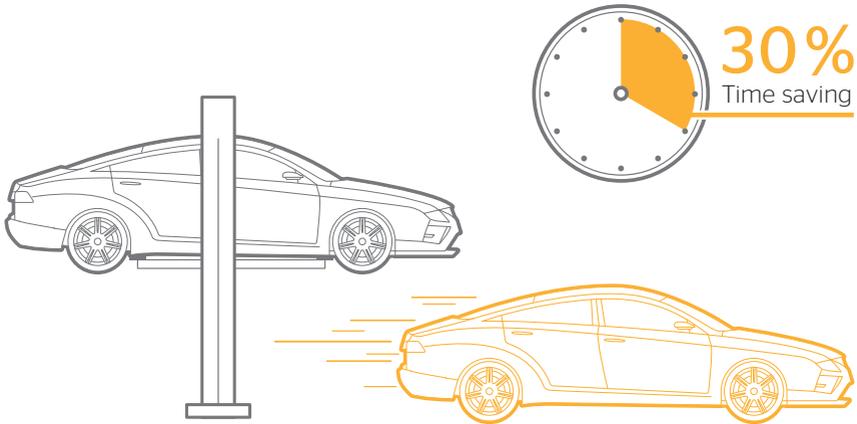

The app is **easy to use** on a tablet (iOS & Android) and can conduct vehicle checks without any difficulty.

The results are automatically documented, preventing manual input errors. Predefined checklists from Continental ensure **perfect organisation**. Nothing can be overlooked during the reception process and the vehicle inspection.

Car owners have a transparent view of the vehicle's health status when it enters the workshop. In this way damage and other problems can be identified on the spot and repairs arranged immediately – a digital solution that also gives you **many opportunities for additional business**.

The software spans a **wide range of vehicle brands** thanks to Continental's experience with more than 30 manufacturers.

Data Acquisition Device

The data acquisition device provides everything you need in your workshop for reading out and transferring diagnostic data. Ideal for the vehicle reception process.

- › Fast assessment of vehicle condition and service needs
- › Digital checklist
- › Tampering detection
- › Good opportunities for sales of additional services and spare parts
- › Easy-to-read PDF reports
